

This is a test file that is meant to be used with the PDF2Audiobook application.

Instructions for Use:

1. Place this file in the C:\Users\Current_User subdirectory
2. Open the PDF2Audiobook application, located in the dist folder of the code download
3. Enter the name of the PDF file in the PDF name field - in this case TestPDF (Note that some PDF formats are not supported.)
4. In the Save File Name field, enter the name for the mp3 file that will be generated
5. Enter a starting and ending page range - the sample PDF is 2 pages
6. Select a language from the Language dropdown box
7. Click the Convert button
8. The Conversion Progress bar will indicate the progress of your conversion
9. Once complete, audio will begin to play
10. From the application, you may choose to Pause, Resume, or Exit with the corresponding buttons
11. The newly created mp3 file can be found in the dist folder and played independently from the application

For more in depth information, please refer to the README file.
